

Cookie Policy

IMPORTANT NOTICE: PLEASE READ CAREFULLY BEFORE USING THIS WEBSITE: This site uses cookies to store information on your computer. This policy explains how we use cookies and may be amended, from time to time, without notice. To ensure that you are using this site with full and up-to-date information of how we use cookies please review this policy regularly as any amended policy will be updated on the site. By using this site you agree to the placement of cookies on your computer in accordance with the terms of this policy. If you do not wish to accept cookies from this site please either disable cookies or refrain from using this site.

Cookies make websites work better.

Cookies are small text files placed on your computer by websites or sometimes by emails. They provide useful information to companies, which help in a variety of ways. For you, it means you can use the site more efficiently and save time by not having to re-enter your details each time you visit. They also make sure you receive the most relevant information from Delphi. For us, cookies help us to analyze how our customers interact with our sites so we can make improvements.

We use three types of cookies on our websites:

- Session cookies that are deleted after each visit.
- Persistent cookies that remain in place across multiple visits to our sites.
- Third-party cookies that are used by our approved business partners.

Some of these cookies are essential and some are non-essential.

Essential Cookies

Certain cookies are necessary in order for you to use our websites. These are used 'in-session' each time you visit and then expire when you leave the site. They're not stored on your computer and they don't contain any personal data. However, you can delete them via your browser if you wish to, but this will restrict the functions that you're able to carry out on our sites. For more information about how to disable cookies in your browser please visit the [About cookies website](#)

Here's a list of essential cookies and how we use them:

Session Cookies	These enable you to carry out some essential functions on our sites, such as maintaining login details for the session or a transaction. They also help by minimizing the need to transfer information across the internet. They are not stored on your computer and they expire when you terminate your browser session.
Tracker Cookies	These enable us to recognize repeat visitors to the site. By matching an anonymous, randomly generated identifier, we're able to record specific browsing information such as how you arrive at the site, the pages you view, options you select, and the path you take through the site. By monitoring this information we're able to make improvements to our sites. We use Google Analytics to analyze page use, page interactions and the routes our customers take through our sites. These are known as 'web metrics'. We don't record any personal information you provide.

Non-essential Cookies

These cookies are usually supplied by our business partners and help us to filter out irrelevant messages or pop-ups, and to make sure that we only send you information that's interesting and relevant to you. We also use some non-essential cookies for analytical purposes. Below is a list of non-essential cookies and how they're used:

Google Analytics	From time to time Delphi PLC uses Google Analytics. This is a web analytics service provided by Google enabling us to recognize repeat visitors to the site. By matching an anonymous, randomly generated identifier, we're able to record specific browsing information such as how you arrive at the site, the pages you view, options you select, and the path you take through the site. By monitoring this information we're able to make improvements to our sites. Google also reserve the rights to the data collected.
-------------------------	--

The Google Analytics features we have implemented are based on Display Advertising (e.g., Remarketing, Google Display Network Impression Reporting, the DoubleClick Campaign Manager Integration, or Google Analytics Demographics and Interest Reporting).

Using the Google Ads Settings, users can opt-out of Google Analytics for Display Advertising and customize Google Display Network ads. We use Remarketing with Google Analytics to advertise online. Third-party vendors, including Google, may show your ads on sites across the Internet.

We and other third-party vendors, including Google, use first-party cookies (such as the Google Analytics cookie) and third-party cookies (such as the DoubleClick cookie) together to inform, optimize, and serve ads based on someone's past visits to your website.

We and other third-party vendors, including Google, use first-party cookies (such as the Google Analytics cookies) and third-party cookies (such as the DoubleClick cookie) together to report how your ad impressions, other uses of ad services, and interactions with these ad impressions and ad services are related to visits to your site.

You can accept or block cookies

By using our websites, you agree that we can place both essential and non-essential cookies on your device.

You can block any cookies from any website through your browser settings. For more information about how to disable cookies in your browser please visit the [About cookies website](#)

If you share the use of a computer, accepting or rejecting the use of cookies will affect all users of that computer.

Flash Cookies

These cookies make it quicker and easier for you to access sites on subsequent visits that use Flash technology. Deleting them means you may have to re-enter information each time you visit the same site. But just like any cookie, you can delete Flash cookies

by going to the Settings Manager for your Adobe Flash Player. You will be taken to the Adobe website, which lists the websites with the cookies in your browser. Just click Delete opposite the relevant website.

Find out more

You can find more information about cookies at www.allaboutcookies.org, which gives details on how to delete cookies from your computer. For information on how to do this on your mobile phone browser, please see your handset manual
